MECHANICAL ENGINEERING DEPARTMENT

ACADEMIC YEAR 2023-2024

INDUSTRY VISITS

Every year, the students of the Mechanical Engineering Department visit industrial units as part of the "Engineering Failure Analysis Course". The Erasmus students who attend the course, also participate in the specific activity. This year the students visited the company KASSINAKIS S.A. (a plastic & electrical material factory), and the Eurobend Company (a Manufacturing Company of Advanced Technology Machinery industry). The visits were very constructive as the students found themselves in an industrial environment, combining theoretical knowledge with production process. The Erasmus students were particularly impressed by the welcome and the English-speaking tour.

25TH MAY 2024 – KASSINAKIS S.A.
